

## **MISSION STATEMENT -**

**'Excellence in all we do'.**

## **AIMS OF THE SCHOOL**

Schools need aims where they seek to achieve clear set goals by which they should be judged. With the help of everyone working together the following are achievable.

- To recognise and encourage talent of all kinds and of all degrees, and endeavour to stretch the intellectual, creative, and physical capacity of individuals in an atmosphere of high expectation in order to enable them to realise their potential.
- To identify and develop existing strengths and offer new opportunities to all staff and pupils.
- To give every pupil a continuing sense of enjoyment, discovery and achievement by providing appropriate quality education as part of the life long learning process.
- To develop a caring and orderly community exercising concern and respect for moral values and for the welfare of others and the environment.
- To promote understanding and participation in the partnership between home, school and community.
- To help pupils develop lively enquiring minds; giving them the ability to reflect, question, to argue rationally, and to contribute to the wider community.
- To create a framework for pupils to become self-sufficient, independent, and flexible, so that they are able to take their place in a complex and evolving society.
- To encourage pupils to respect and value the achievement of others and be tolerant of the beliefs and conduct of other races and creeds.
- As a specialist college, to be a centre of excellence for Mathematics and Computing, sharing our expertise and resources in a wider educational field through the LEA and a network of local schools.
